VITALE

Mineral-infused pool water

Vitale Mineral Salts creates a luxurious swimming experience by enriching pools with therapeutic minerals and proprietary balancing chemicals that work harmoniously to help maintain water balance. This drastically reduces the time and costs involved with ongoing maintenance.

- Mineral-rich blend creates silky swimming conditions
- Moisturising formula soothes sensitive skin
- Unique blend provides relief to muscular inflammation and fatigue
- Reduces pH and Alkalinity fluctuations associated with salt chlorinated pools

Vitale Mineral Salts include proprietary balancing chemicals that reduces pH and Alkalinity fluctuations.

Balanced Pool Water
Correctly balancing your pool enhances your swimming experience, keeps the pool looking clean and eliminates discomfort and irritation.

pH
Poor pH balance can lead to skin and eye irritation, brownish water or a cloudy pool.

Total Alkalinity
Unbalanced alkalinity can lead to irritation of the eyes, throat or ears, greenish water or a cloudy pool.

Please note: Whilst Vitale helps reduce pH and Alkalinity fluctuations, it will not replace the need for continued use of balancing chemicals.

Experience the Ultimate in Water Clarity

Vitale Mineral Salts and pH control work in tandem to deliver the ultimate in water clarity

Magnesium-enriched pool water is renowned for its mild floccing abilities, enhancing the pool filter's capacity to remove fine materials like dust and dirt, resulting in a crystal-clear swimming experience.

Combined with pH control, which features an integrated water clarifier, you can achieve unparalleled water clarity.
