Beatbot

3-Year Warranty

Beatbot Sora P7

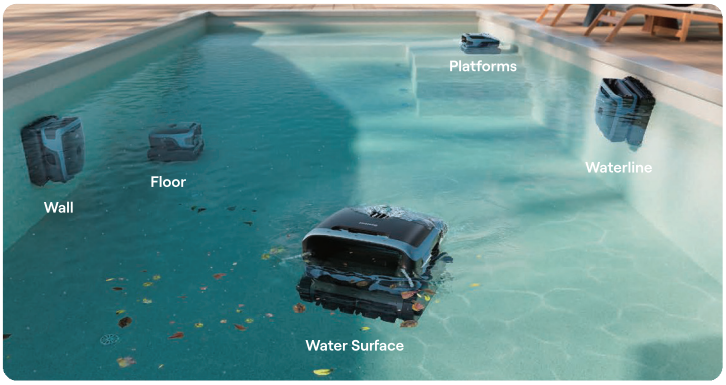
Total Clean. From Depth to Surface.

Cleaning Coverage

Water Surface | Floor | Wall | Waterline | Platforms (>20 cm/ 8 inch)

Advanced JetPulse™ Water Surface Cleaning

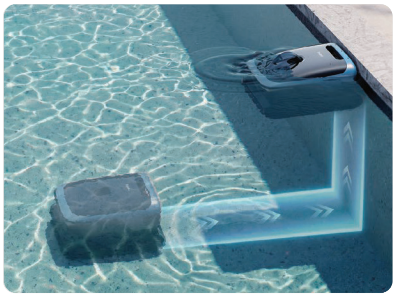
A dual water jet system with converging and outward-extending flows actively guides floating debris into the suction center, dramatically improving surface cleaning efficiency.



Complete Coverage Including Platform Cleaning[1]

Cleans the floor, walls, waterline, and water surface in a single cycle, and reaches platforms and shallow areas down to 8 inches that most cleaners can't access. This reduces manual spot cleaning and helps prevent algae in hard-to-reach areas.

Beatbot Sora P7 Specification	
Product Category	Cordless robotic pool cleaner
Pool Type	Above ground & in-ground pools
Pool Shape	All shapes, such as rectangular, round, kidney, and freeform
Pool Materials	All materials including concrete, ceramic tiles, vinyl, and fiberglass
Maximum Pool Size	Up to 3,230 square feet (300㎡)
Run Time	Up to 7 hours runtime for water surface cleaning; Up to 5 hours runtime for floor cleaning ; Up to 4.5 hours runtime for floor, walls, and waterline cleaning
Filtration	6L filter with 150 μm filtration & optional 3 μm ultra-fine filter
Weight	22.9 lbs / 10.4 kg
Dimensions	17.09 in (L) × 16.93 in (W) × 11.22 in (H) 434mm(L) × 430mm(W) × 285mm(H)
Connectivity	Wifi + Bluetooth connection
Charging Time	Approx. 4.5h, quick 65W charging



Smart Surface Parking for Easy Pick-Up

A four-chamber floating system lifts the robot to the water surface when cleaning is done, while SmartDrain™ releases internal water to make retrieval lighter and easier.

Superior Cleaning with 25700 LPH Suction Power

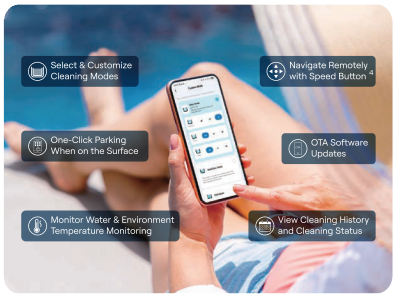
The Sora P7's HydroBalance™ Structure uses a center-mounted, self-developed high-efficiency pump to generate 25700 LPH of suction power, removing fine sand, whole leaves, and stubborn algae with ease.

Up to 5 Hours of Floor Cleaning with 10,000mAh Battery

A 10,000mAh battery delivers up to 5 hours of floor cleaning or 7 hours of surface cleaning[2], covering pools up to 3,230 sq ft on a single charge without interruptions.

Ultra-Large 6L Debris Capacity with Fine Filtration

The oversized 6-liter filter holds up to 800 leaves, allowing it to handle entire autumn leaf drops without needing to be emptied mid-cycle. Once heavy debris is cleared, use the optional 3-micron ultra-fine filter[3] to capture microscopic particles and achieve crystal-clear water.



Beatbot App Tailored & Effortless Cleaning Control

Download the Beatbot app to customize cleaning, monitor your pool's condition, and keep your robot up to date with the latest performance upgrades via OTA software updates.

Notes:

1. The Sora P7 is capable of operating in water as shallow as 8 inches and cleaning platforms with a minimum area of 3.3 feet × 3.3 feet.
2. Based on the product being fully charged and operating in Max Mode.
3. 3-micron ultra-fine filter is sold separately.
4. Due to Wi-Fi limitations, app navigation and one-click parking only work when the robot is on the water surface.
5. All data in this document come from Beatbot labs. Actual performance may vary depending on the specific environment and conditions of use.
