# Transform your pool into a therapeutic oasis

Vitale Mineral Salts are a unique blend of high purity magnesium and salt, combined with proprietary balancing chemicals that reduces pH and Alkalinity fluctuations associated with salt chlorinated pools.

- Mineral-rich blend creates silky swimming conditions
- Moisturising formula soothes sensitive skin
- Provides relief to muscular inflammation and fatigue
- Reduces time and costs associated with water chemistry

For a swimming experience that is more than skin deep, dive into a Vitale mineral pool.

# Experience the health benefits of mineral infused water

## **Benefits of Magnesium — nature's magical mineral**

Vitale Mineral Salts enables you to experience the health benefits of magnesium every time you swim.

Magnesium is recognised by medical professionals for its ability to alleviate a variety of ailments relating to the skin, muscles and nervous system. When added to pool water, it creates a luxurious swimming experience.

A large body of mainly anecdotal evidence has shown that magnesium salts — the main mineral in the Dead Sea and naturally occurring in the human body — significantly improves skin hydration, soothes common skin conditions such as dermatitis, eczema and psoriasis, and provides temporary relief from muscular inflammation and fatigue.

Vitale Mineral Salts include proprietary balancing chemicals that reduces pH and Alkalinity fluctuations.

### **Balanced Pool Water**

Correctly balanced water is essential to the pool's water management at the same time protects the pool and equipment from corrosion or scaling and swimmers from discomfort or irritation. Both pH and Total Alkalinity are two key factors that contribute to a healthy, balanced pool.

### **pH**

Maintaining correct pH levels play an important role in the effectiveness of your pool's sanitiser as well as protecting the pool surface and the equipment.

### **Total Alkalinity**

At the correct levels, Alkalinity acts as a buffer on the pH by controlling fluctuations.

Low Total Alkalinity makes it very difficult to control pH. High Total Alkalinity makes pH very difficult to adjust, as well as scale formation and water cloudiness.

*Please note: Whilst Vitale helps reduce pH and Alkalinity fluctuations, it will not replace the need for continued use of balancing chemicals.*

# Crystal clear water

## **Improved water clarity**

Magnesium enriched pool water is also known for its mild flocking abilities, which helps increase the capability of the pool filter to remove particularly fine material such as dust and dirt to create a crystal clear swimming pool.

With a Vitale Mineral Salts you can expect less maintenance and a more pleasant bathing experience.

# Dosage chart

Vitale Mineral Salts Dosage for new pool start up				
Salt chlorinator 3000ppm Salinity				
Pool Litres	20,000	30,000	40,000	50,000
