

An underwater photograph of two young girls swimming in a pool. The girl in the foreground is wearing blue goggles and a colorful swimsuit, reaching out towards the camera. The girl behind her is wearing pink goggles and a blue swimsuit, also reaching out. The water is clear blue with some bubbles and light reflections.

Q360TM+

ULTRA PERFORMANCE IN-FLOOR CLEANING

Redefining Swimming Pool Efficiency

B L U E S Q U A R E[®]

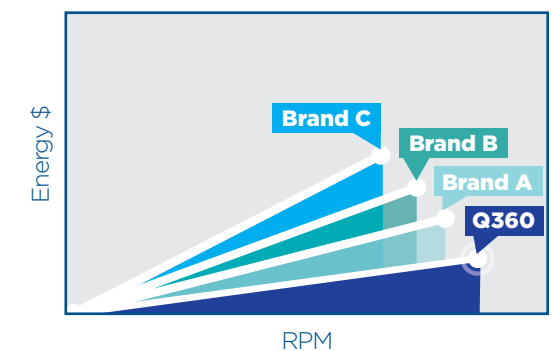

**SAVING TIME & ENERGY
ONE CAREFREE POOL
AT A TIME**

Maximum cleaning & circulation efficiency engineered for today's modern pools

- Automatically cleans your pool while you relax
- Circulates water and chemicals to every square centimetre of your pool
- Independently proven to reduce chemicals and energy costs
- Q360® valve circulates with today's latest energy efficient pumps
- Q360 Performance Plus™ cleaning jets deliver more cleaning distance and more efficiency than ever

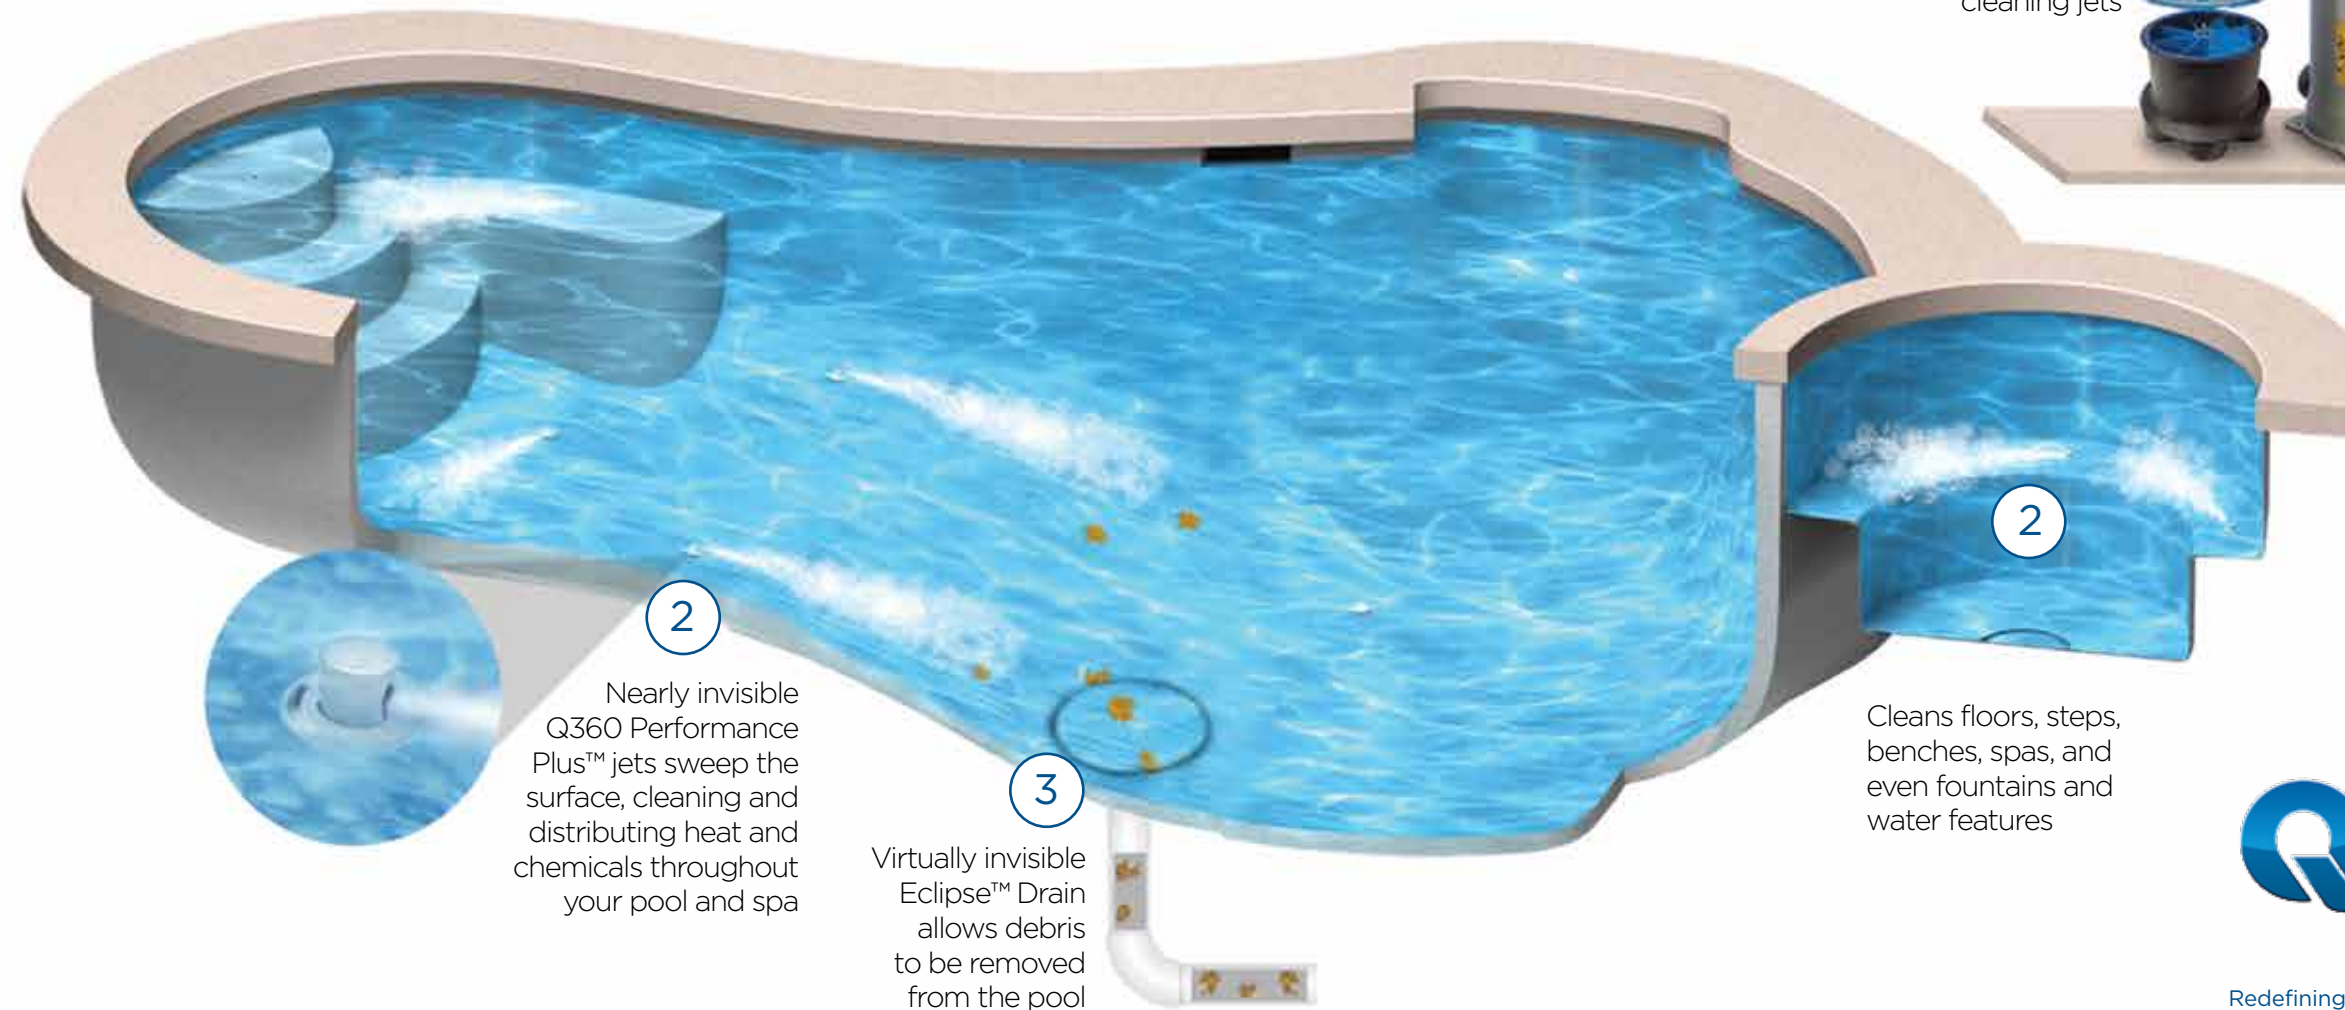

**Setting New Standards
for Energy Efficiency**

Energy dollar for energy dollar you get more cleaning power and flow with Q360+

Efficiently Cleans and Circulates in 4 easy Steps

Debris is automatically swept into the main drain and sent to the leaf trapper

Redefining Swimming Pool Efficiency

1

Variable speed water delivery system

Maximum performance at every RPM

The Q360® patented water valve is the heart Q360+ cleaning system. The proven track record of this ultra-efficient valve delivers maximum flow with minimal noise and water pressure variations making it the performance leader in the industry.

- Smooth and effective water flow at any pump speed
- 6-port design distributes powerful water to each jet; systematically circulating the complete body of water
- Transparent lid for viewing operation
- 8-veined Power Turbine for smooth energy transfer
- Triple traction gear drive directs water flow
- Two speeds available for maximum efficiency

2

New breakthrough performance jet

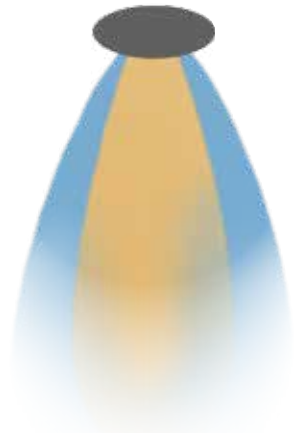

Setting new industry standards

Newly engineered Q360 Performance Plus™ cleaning jets feature a nozzle which improves cleaning like never before.

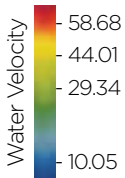

- Enhanced cleaning performance
- 3 selectable nozzle designs for customized cleaning options
- Exclusive Hybrid advancement mechanism provides 360° cleaning
- 5 color options to blend into any surface

New jet design yields more cleaning than ever

■ New expanded cleaning coverage
■ Typical in-floor cleaning coverage

New jet delivers more cleaning velocity to the floor where it counts

3

The most advanced drain on the market

Remove large debris with beauty and ease

- Blends into any pool surface making it virtually invisible
- Single Source Suction
- Circular design fits any pool shape and style
- Meets all industry anti-entrapment safety regulations
- Compatible with 40 and 50mm PVC Class 12 pipe
- Made in the USA
- Easy access portal
- Optional Hydrostatic Valve for high water tables
- No stubbing toes
- Flush design, robot cleaners won't get stuck
- Available in two colours, White and Grey
- Great for spas and catch basins
- Max allowable pulling power*

*157 GPM @ 1/2 foot per sec ANSI 16

4

One of the largest debris capacities on the market

Combine with the Waterco Leaf Trapper to maximize performance

The Waterco Leaf Trappers innovative design provides one of the largest debris capacities on the market! The leaf trapper captures debris and channels it to the bottom of the 800 micron filter bag minimizing flow loss for maximum efficiency. The innovative design keeps heavy debris from interfering with the operation of your pool equipment and filtration system while maintaining steady water flow.

- Designed for maximum flow while allowing for high volume debris
- Conveniently located by the pool equipment for easy access
- Can plumb 2 or more parallel for heavy debris environments
- High capacity bag design
- No unsightly deck lids
- Clear pressure safe lid
- Sized for 50mm PVC Class 12 pipe

5

Award winning pre-filtration device

Add the Waterco MultiCyclone to intercept more dirt

Waterco's award winning MultiCyclone is a brilliant pre-filtration device that works on the basis of centrifugal water filtration and is designed with no moving parts and no filter media to clean or replace.

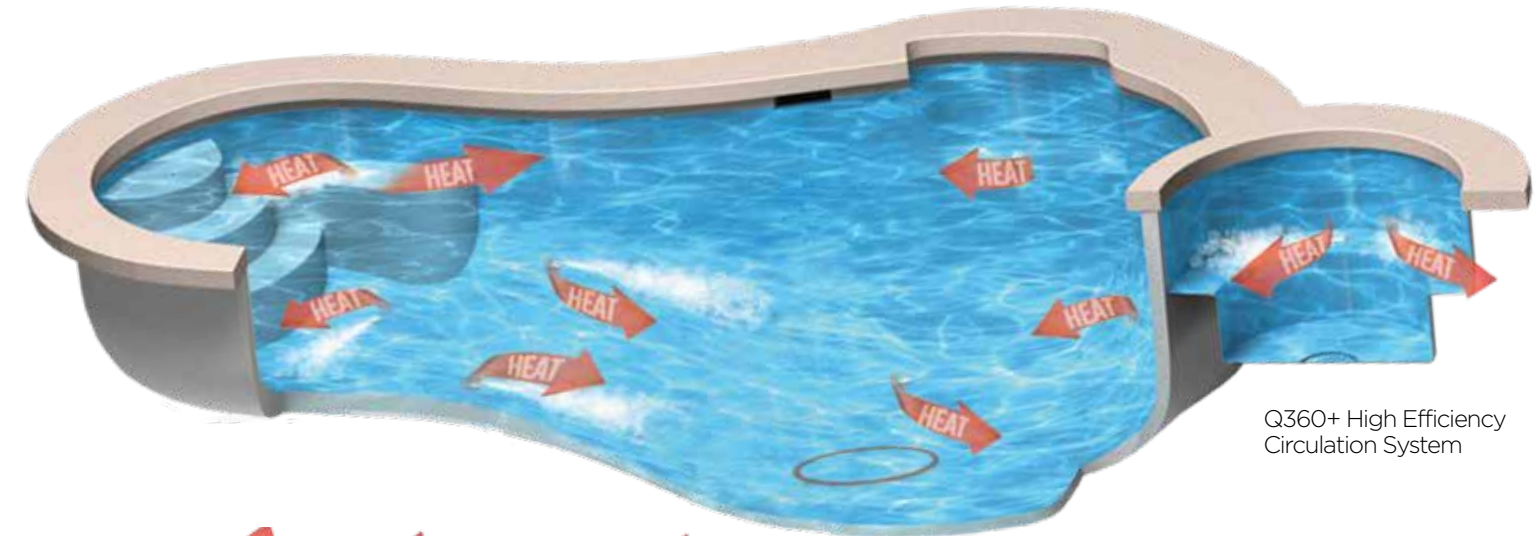

Using the MultiCyclone in line with an in-floor cleaning system pre-filters up to 80% of the incoming dirt load easing the workload for the filter. As the MultiCyclone intercepts more and more dirt, the flow rate remains unchanged.

- Improved pool water circulation
- Enhancing the performance of the in floor cleaning system
- Minimising filter maintenance and saving water
- No filter media to clean or replace

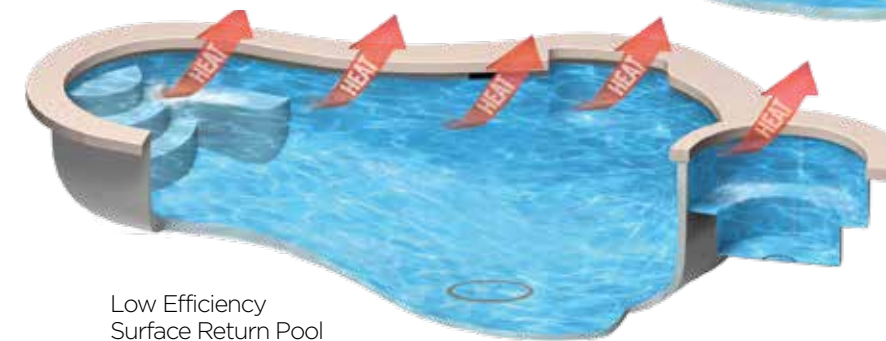

Proven to save you chemicals and energy for the life of your pool

Energy dollar for energy dollar more cleaning power. Q360+ save up to 15%-20% in chemical costs and 20%-30% in heating costs.

Q360+ High Efficiency Circulation System

Low Efficiency Surface Return Pool

Q360+ is the only system that consistently delivers savings throughout your entire pool at every pump speed.
