water, the liquid of life

W LEAF RAKE OMNI

The Smarter, Cleaner & Faster Way to Clean Your Pool

LEAF RAKE OMNI

Engineered to tackle fine pollutants, floating organic debris, and leaves in a single pass. The Leaf Rake Omni combines patented hydrodynamic Venturi design with an innovative tool-free net replacement system, delivering unmatched efficiency, durability, and convenience for pool owners and service professionals alike.

The Omni Solution

The **Leaf Rake Omni** elevates manual pool cleaning through advanced hydrodynamics and smart design.

Hydrodynamic Venturi Design

Engineered with a hydrodynamic Venturi funnel profile that drastically reduces drag and underwater resistance for effortless skimming from surface to floor.

Zero-Regurgitation Compaction

A high-velocity Venturi pressure gradient forces both fine pollen and large debris into the net's tail, compacting it into a self-contained core that prevents backflow into the pool.

Total All-Surface Debris Capture

Achieve complete waterline-to-pool-floor cleaning. Captures everything from pollen to submerged heavy leaves without bypassing debris.

Effortless, Mess-Free Emptying

Compacted debris remains tightly bound in the tail. Simply invert the tip to release the waste cleanly — no thrashing, no mess.

Dual-Net Versatility

Features a heavy-duty frame with a quick-change net system. Effortlessly adapt from daily maintenance to heavy leaf falls by swapping to an optional coarse net in under 10 seconds.

Commercial-Grade Construction

Built with heavy-duty, high-impact materials engineered to withstand harsh UV exposure, pool chemicals, and daily use by pool service professionals.

Warranty :

The Omni is covered by a 2-year warranty against faulty manufacture and workmanship for domestic use and commercial 1-year, excluding normal wear and tear of the net attachment.

Waterco pioneers reliable solutions for healthy, safe water environments, which are used in residential, commercial and industrial applications in over 40 countries.

Established in 1981, it has since become a global brand recognised for designing and manufacturing filtration and sanitisation innovations for the swimming pool, spa, aquaculture, and water purification sectors.
