WATERCO
water, the liquid of life

www.waterco.com.au

The background of the image is a close-up, high-angle shot of water. The water is a vibrant blue color, and the surface is covered in numerous small, overlapping ripples that create a textured, shimmering effect. The lighting is bright, causing some areas to appear lighter and more reflective than others. The overall composition is clean and serene, emphasizing the natural beauty and purity of water.

Efficient.Clean.Long Life

Waterco's Glass filter media is manufactured from recycled glass, it is an environmentally friendly and viable alternative to sand. Plus it offers finer filtration than sand.

High Purity

Whereas other filter media may contain a variety of contaminants, Waterco's Glass filter media is chemically inert for superior purity. In fact, it does not contain any crystalline free silica or heavy metals.

Its high purity also greatly reduces its initial backwashing requirements, prior to commissioning a filter, enabling a rapid start up of media filters.

Recycled

Raw material is taken directly from household recycling schemes and is 100% recycled glass.

This offers environmental savings when compared with alternative natural resources which would otherwise be used.

Efficient

It removes more materials and pollutants than sand, saving on backwashing and resultant water, heating and chemical treatment costs.

Clean

It is less susceptible to bio-fouling. The heat-treated surfaces are smooth, requiring less remedial action and less chemical treatment to kill pollutants.

Long Life

It has undergone specialised heat treatment process, which means that its degradation is slower and it therefore has a longer life span.

DEPTH FILTRATION

Glass filter media operate on the basis of “depth filtration”; dirt is driven through the filter bed and trapped in minute spaces between the particles of filter media allowing the cleansed water to pass through.

Grade 1 0.5 - 1.0mm
(equivalent to Grade 16/30 sand)

Chemical Compositions

Silicon dioxide (SiO ₂)	72.2%
Sodium oxide (Na ₂ O)	13.3%
Calcium oxide (CaO)	10.9%
Magnesium oxide (MgO)	1.65%
Aluminium oxide (AL ₂ O ₃)	1.5%

Approved under Regulation 31 of the Water Supply (Water Quality) Regulations 20002 and is listed in the "List of Approved Products and Processes for use in Public Water Supply" published by DWI.

Approved for use in public water supplies and by the national authorities. (or appropriate specific national authority)

CONTACT WATERCO

Waterco's head office is situated in Sydney, Australia with international offices, manufacturing plants and warehouses located in Australia, New Zealand, Malaysia, Indonesia, Singapore, China, the US, Canada, France and the UK.
