

ALPHAFLO ECO-V 150

Energy Saving Variable Speed Pump

- Slash Energy Use By Up To 80%.
- Ultra Quiet Operation
- Enhanced Water Clarity.

ALPHAFLO ECO-V 150

Energy Saving Variable Speed Pump

The pump's impeller and diffuser design have been chosen carefully to help improve flow and efficiency by eliminating constrictions and obstacles maximises the hydraulic output of the pump while minimising turbulence.

The pump's hydraulic efficiency also comes from the design of the pump body that has improved water flow gaining performance outcomes that can shorten run times and reduces energy consumption leading to lower operating costs.

Plus a new heavy-duty pump bracket and insulation, which helps in absorbing motor vibration.

- Energy rating of 5.5 stars
- Excellent head & flow capabilities
- Variable permanent magnet brushless DC motor
- Ultra quiet operation

SLASH ENERGY USE BY UP TO 80%.

Energy Saving

A pool filtration system does not require to be operated at a pump's maximum water flow rate as with the use of a conventional pool pump limited to one speed. In fact, your pool's filtration efficiency improves at lower flow rates.

As a pool's filtration cycle occupies 99% of the run time of a pool pump, you can operate the Alphaflo ECO-V 150 on its low (ECO) speed setting for a majority of its running time, leading to a potential 80% savings in energy.

Equipped with the very latest variable speed permanent magnet brushless DC motor, Alphaflo ECO-V 150 is capable of lowering its motor speed, reducing water flow and lowering its energy consumption.

Variable 3 Speed Options

Alphaflo ECO-V 150's variable 3 speed options cater for most pool functions.

High speed

Vacuuming and backwash - 1% of the time

Medium speed

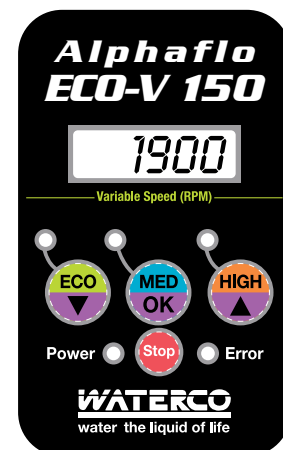

Automatic pool cleaners

Low speed

Filtration - 99% of the time

Variable speed

Alphaflo ECO-V 150 is also equipped with an energy-saving variable speed motor that offers the finest adjustment in operating speed with 25 RPM increments, allowing fine-tuning of the pump's motor speed to perfectly match the flow requirements of the swimming pool, maximising energy savings and minimising pump noise.

**PERFECTLY MATCH
FLOW REQUIREMENTS
AND MAXIMISE ENERGY
SAVINGS.**

SAVE HUNDREDS OF DOLLARS OFF YOUR ENERGY BILLS.

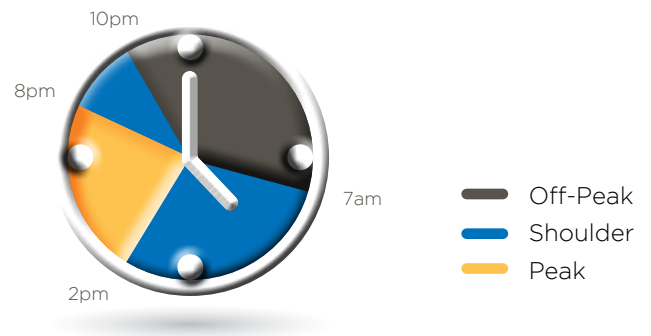

Ultra Quiet

Alphaflo ECO-V 150 operates most economically and with the lowest noise level at its low speed setting. Its low speed setting significantly reduces the pump's vibration, motor noise and water turbulence to an ultra low 59 decibels (dBA).

Off-Peak Operation

Its low noise levels enable it to be operated at times that are not allowable for conventional pool pumps. An Alphaflo ECO-V 150 allows you to take advantage of off-peak electrical tariff periods, without upsetting your neighbours.

ENHANCE WATER CLARITY

Benefit of Slow Flow

Lowering a pumps flow rate not only significantly decreases the pump's energy requirements, but also reduces water flow resistance in your pool equipment and plumbing. Even though you may need to operate the Alphaflo ECO-V 150 longer, it is far more efficient pumping low water flow compared to high water flow.

A slow flow rate also has the added benefit of improving your pool's filtration efficiency, enhancing the clarity of your swimming pool water. Plus your automatic chemical dosers and salt chlorinators are also more effective when the pool water is circulated longer.

KEY FEATURES

The Alphaflo pump has a unique design that stops water from leaking into the motor through the drive shaft.

A mechanical seal may leak water if the pump is ever run dry or simply be worn out. If a leaky mechanical seal is not replaced promptly, water will travel up the shaft of the motor and ruin the motor in a very short period of time.

Waterco's unique Alphaflo design protects the pump motor's end shield from any water contact, by allowing any leaks through worn-out mechanical seals by draining out of the pump.

Variable 3 speed control panel, IPX5 rating

Permanent magnet brushless Variable 3 speed DC motor

UV stabilised & corrosion resistant

50mm quick connect barrel unions for UPVC pipe

Clear basket lid & large 2.05 litre strainer basket

High grade carbon / graphite mechanical seal with 316 stainless steel spring assembly

Strong single piece glass filled thermoplastic pump body

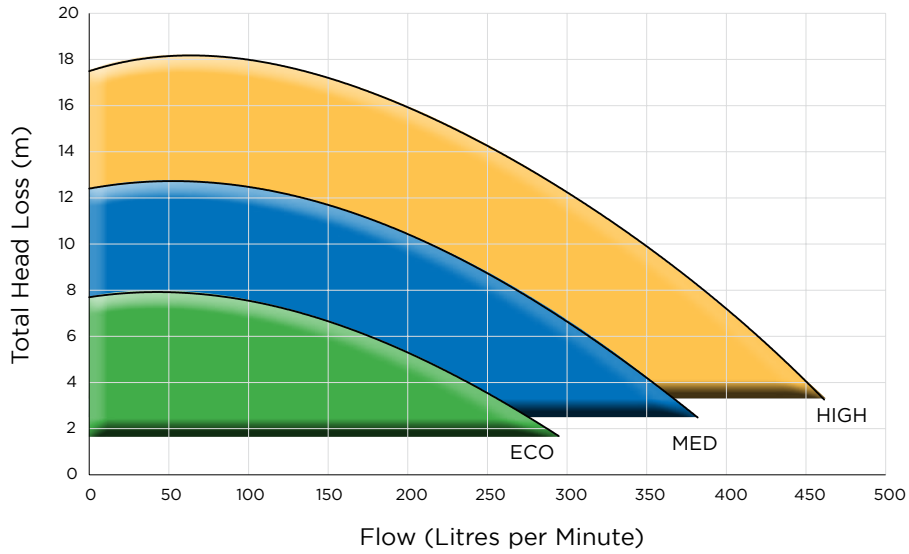

Drain plugs

Stable & insulated support base

Hydraulically efficient single-piece diffuser/nozzle design impeller

Fan cooled thermal overload protection

Alphaflo ECO-V 150 Performance Curves

Alphaflo ECO-V 150 Noise Levels

- ECO speed (1900rpm)
- Medium speed (2410rpm)
- High speed (2850rpm)

Warranty

Pumps	3 years (conditional)*
Wet End	3 years
Motor, mechanical seal, hair & lint pot lid, o'ring, basket, impeller & diffuser	2 years
Commercial applications	1 year
Labour	1 year

*Please refer to Waterco's warranty terms and conditions

Specifications

Length (mm)	Height (mm)	Width (mm)	Packaged Weight (kg)	Inlet/Outlet (mm)	Strainer Basket (lt)
657	343	253	15.5	50	2.05
