

eXact[®] iDip[™]

The new eXact[®] iDip[™] is the first product in the pool industry to provide complete wireless connectivity between a smartphone/tablet and a handheld photometer. Data is seamlessly transferred between the two devices when paired with the eXact[®] iDip using Bluetooth[®] Smart wireless technology. The application stores the test results history of multiple pool, spa and water sources.

Data can be shared via email and the built-in GPS feature allows for easy retrieval of water locations. Pool technicians will appreciate the ability to store customer data, eliminating repetitive data entry tasks while saving time and money
